

Cost Estimate — Participant Transit

Date prepared: August 14, 2026

Prepared for: Community Initiatives Program (CIP) Project Grant application — GATE Front Office

Basis of estimate

Public transit fares in Calgary are set and published by Calgary Transit, so no third-party vendor quote applies to this line. This estimate is built from Calgary Transit's published **2026 adult single fare of \$4.00** (one-way, valid 90 minutes). Source: Calgary Transit — calgarytransit.com (2026 fare schedule). A dated printout of the published fare page is attached as supporting documentation.

Calculation

Item	Detail	Amount
Adult single fare (Calgary Transit, 2026)	one-way, valid 90 min	\$4.00
Round trip per program day	2 single fares	\$8.00
Participants requiring transit support	~10 of 15 (others use own vehicles)	10
Program days	12 weekly Saturdays	12
Total rides	10 participants × 12 days × 2	240
Total estimated transit cost	240 rides × \$4.00	\$960.00

Budget line: \$1,000 (CIP). Estimated cost **\$960.00**, leaving a small contingency for fare changes or an occasional additional rider.

Notes

- Not all 15 participants require transit support — several have their own vehicles — so the estimate covers approximately 10 participants across the 12 program days.
- Transit support will be provided as single-ride fares or ticket books distributed at each Saturday session (or reimbursed), based on participant need.
- Calgary Transit fares are subject to change; the attached dated fare-page printout documents the rate used.
